

## The Pterosaur Database

### Cycnorhamphus suevicus

A distinctive and primitive pterodactyloid pterosaur with cervical ribs and an un-fused basipterygoid, with a possible plantigrade gait. This species possibly the most primitive of the pterodactyls and other early species may also be attributed as juveniles of this type.

**Holotype:** IMGP Tübingen -

Quenstedt F. A., **1855**, Über Pterodactylus suevicus im lithographischen Schiefer Württembergs. Doctoral thesis, Universität Tübingen.
