

## The Pterosaur Database

### Feilongus youngi

This specimen was found within the Jianshangou Bed, lower Yixian Formation at Heitzigou in Beipiao, Liaoning Province, China. It shows a remarkable conformity with the characteristics of *Gallodactylus* and may well be of the same lineage.

**Holotype:** Skull and mandible at the Institute of Vertebrate Palaeontology and Palaeoanthropology (IVPP), Beijing, China (IVPP V-12539).

Wang X., Kellner A. W. A., Zhou Z. and Campos D. de A., **2005**, Pterosaur diversity and faunal turnover in Cretaceous terrestrial ecosystems in China. *Nature* 437:875-879.
