

### Tendaguripterus recki

A pterosaur jaw fragment from the Middle Saurian Beds at Tendaguru, Tanzania. This specimen is Kimmeridgian / Tithonian in age. The specimen MB-R-1290 Museum fur Naturkunde, Berlin, is an incomplete mandibular symphysis showing teeth which are long and pointed. The teeth have a smooth surface. Although referred to the Germanodactylidae, this species may possibly be considered as a Dsungeripterid.
